Here you'll find the source code of shared library 'librandomtests.so'.

Although a wide variety of systems can be used from the header files developed by NIST RNG, this porting has been developed under openSUSE 10.2, Linux i586.

Check the used environment described below .

This software has been extracted from NIST RNGT software, you must take into account that NIST does not endorse this software nor has been involved in its modification.

No support is given about the shared library librandomtests.so source code.

This software is NO ERROR FREE, take care how you use it. It has been developed for DiceLock project.
